

Orthopedic Software Checklist

FOR SMALL TO MEDIUM PRACTICES

Whether you're a one-provider practice or have multiple providers, these key EHR capabilities may matter. EMA[®] has them—does your system?

CAPABILITIES	WHAT IT DOES AND HOW IT CAN HELP	CAN YOUR EHR DO THIS?
All-in-One System	When EHR, practice management and patient engagement software are all combined in a single platform, it can help streamline workflow and communications.	<input type="checkbox"/>
Cloud, Mobile, Touch Platform	EMA's easy-to-use native iPad interface allows you to tap and swipe through an exam while facing your patients, not your EHR. A cloud system can help reduce certain IT expenses and lets you access records virtually anywhere you have a secure Internet connection.	<input type="checkbox"/>
Intuitive Platform Built by On-Staff Physicians	Our on-staff orthopedists program their medical knowledge into the software, creating a user-friendly and intuitive EHR.	<input type="checkbox"/>
MIPS Platform ¹ and Specialized Registries	Our built-in MIPS intelligence platform computes many quality measures based on the information you document in EMA. Your MIPS data can be submitted through the Modernizing Medicine [®] Qualified Registry.	<input type="checkbox"/>
Turnkey System	No need to build time-consuming templates. EMA comes preloaded with 550+ chief complaints, 4,800+ diagnoses and 2,050+ orthopedic plans and procedures.	<input type="checkbox"/>
Protocols	Create custom “master visits” with commonly used diagnosis, plans and procedures, helping you document a visit in just a few clicks.	<input type="checkbox"/>
Automatic Coding Suggestions	During the exam, EMA populates the note with the information you document and creates a bill based on that documentation that includes suggested ICD-10, CPT, E&M and modifier codes for your review, helping you save time.	<input type="checkbox"/>
Telehealth-Enabled EHR	With high-resolution video chat capabilities, seeing your patients—whether your office is open or closed—becomes easier.	<input type="checkbox"/>
Patient Engagement Tools	Our patient engagement portfolio, which includes our patient portal, patient mobile app, intake kiosk for iPad, self-scheduling, surveys, reminders and messaging, can be used to help alleviate data entry fatigue and keep the line of communication open with your patients.	<input type="checkbox"/>
Dictation with Nuance Healthcare	For physicians who prefer to dictate their notes, EMA offers clinical voice recognition powered by Nuance Healthcare that allows you to document three to five times faster than typing.	<input type="checkbox"/>
Electronic Prescribing of Controlled Substances	Through an interface with Appriss Health's PMP Gateway ² , you can query state PDMP databases when prescribing controlled substances and analyze data associated with prescription history.	<input type="checkbox"/>

Orthopedic Software Checklist

FOR LARGE PRACTICES

In addition to features that are beneficial for smaller practices, larger or private equity-backed organizations need the right infrastructure to provide scalability.

CAPABILITIES	WHAT IT DOES AND HOW IT CAN HELP	CAN YOUR EHR DO THIS?
Centralized Suite of Solutions	Unite the clinical, financial and operational aspects of your practice. Our EHR, practice management, payment platform and patient engagement software works together as part of an all-in-one solution.	<input type="checkbox"/>
True Cloud Platform	EMA syncs data across multiple rooms and locations, helping to improve scalability. And because it's cloud-based, the need for spending money on servers and certain IT services can be reduced.	<input type="checkbox"/>
Subspecialty Capabilities	Opt for an EHR that also supports documentation by foot and ankle surgeons, sports medicine specialists and spine surgeons, so you don't need multiple systems.	<input type="checkbox"/>
Premium Analytics	Access graphical reports and drill into your clinical, operational and financial data to help you plan for long-term success.	<input type="checkbox"/>
Adaptive Learning Engine	EMA's learning engine adapts to the way you practice by remembering your preferences, helping you save time.	<input type="checkbox"/>
Office Flow	See a practice-wide view of patients as they move through the office. Set thresholds for patient wait times, assign staff tasks and help identify bottlenecks and areas of improvement.	<input type="checkbox"/>
Interoperability	Exchange data with your other technology vendors and interface with healthcare information exchanges (HIEs).	<input type="checkbox"/>
Electronic Consent Forms	Skip the hassle of scanning and storing paper consent forms. Instead, let patients sign with their finger or an Apple Pencil to instantly save the form to the record.	<input type="checkbox"/>
Award Winning Customer Support ³	Our professionals can work closely with you through implementation, training and beyond.	<input type="checkbox"/>
Paperless Office	With our suite of software solutions, we can help you work towards a paperless experience from appointment scheduling until after the bill is paid.	<input type="checkbox"/>
